

Curtis Banks | QA Engineer

Seattle, Wa | [Website](#) | [LinkedIn](#) | bankscur@gmail.com |

SUMMARY :

QA Engineer with skills in full-stack development and testing. Versed in cloud platforms, search optimization. I am eager to learn and have an ability to streamline operations and drive revenue through innovative applications.

TECHNICAL SKILLS:

Languages: Nodejs, Javascript, Python, ReactJS

Databases: SQL, DynamoDB

Cloud Platforms: (Amazon Web Services)AWS, S3, Lambda

Testing Tools: Jest, Postman

RELEVANT EXPERIENCE:

QA engineer, [Yum! Brands](#)

Mar 2023 - Nov 2023

- Use project boards including Jira to give team oversight on defect and progress tracking.
- Using SQL to query data in the Redshift AWS
- Research unit test plans, design and develop automated testing scripts in lambda python.
- Effectively Communicate with international QA/Dev cross functional teams to assist with blockers.
- Create and present presentations of conceptual automation scripts to leadership.
- Manually test AI voice models for ordering systems.
- Testing of full stack applications throughout the lifecycle, after deployment using postman and CI/CD .

PROJECTS:

Database validation (Python)

System that looked through Large order Json files addressing an array's initial element/object. Reading through the Json object for Keys and values, then initializing a new file, to build a report on the finding. Jira was the ALM for tracking progress for general oversight for leadership as well as logging bugs, command line activated. This system made testing regular POS updates more effective by 25%.

EDUCATION:

High School St. louis, Mo.
